I understand that Satellite radio is under attack. The National Association of Broadcasters (NAB), the group that represents the large radio and television owners, is using its lobbyists, campaign contributions and political influence to stifle competition and stop XM from offering traffic and weather information and other valuable services to its listeners. NAB is trying to limit XM's first amendment rights!

I am in support of XM radio and do not want to see its programming stifled or censored in any way. I believe that XM should be able to offer its listeners traffic reports, weather information and any other services it chooses to air.
